

FastDEK® Installation Kit

Item Code and Description

- FB1000-IK
- FastDEK Installation Kit

General Product Description

- kit includes essential items for installing a FastDEK on wood and sealing the joints after all decorative flooring and wall materials are installed

Physical Characteristics

- kit includes: 6 tubes of Tank/10 polyurethane construction adhesive, 2 tubes of silicone caulk, 20 ft. of joint reinforcement tape with adhesive strip, and 1 drain connector
- all tubes of adhesive and caulk are approximately 10 oz. and fit standard caulk guns
- joint reinforcement tape has an adhesive strip along one edge

Performance Characteristics

- use the construction adhesive to bond a FastDEK to joists or to subfloor. You can also use modified thinset mortar to bond a base to subfloor or to concrete
- use the drain connector to connect the shower base to a shower drain line
- use the reinforcement tape to waterproof the base's perimeter to the surrounding tile backer materials
- use silicone caulk to seal base perimeter joints after the base and all decorative materials are installed

Compliance

- NA

Other Information

- 10 year limited lifetime warranty on kit products
